## Current Investigations

### SPECIAL NOTE:

It is IMPORTANT to note that subject's financial and cash flow position was compounded in August 2003, with the dismissal of a senior administration manager for conduct unbecoming. Investigations continue to establish whether or not, a case of fraud is to be answered.

Subject is generally considered by Trade Suppliers, to be a viable concern and it is expected to trade it's way out of it's liquidity problems.

### INVESTIGATION:

Interviewed in January 2004, Ian Sample, Director, confirmed or supplied the above details and provided the following financial information:

Turnover for the financial year ended 30-JUN-2003 was \$8,926,000, an increase on the previous financial year's result of \$7,142,000 and, \$6,230,000 in 2001.

Projected turnover for the current financial year is for a further increase to between \$9,500,000 and \$10,000,000.

Strong increase in turnover for 2002/2003 was primarily attributed to a high level of building activity resulting in more roadwork and subdivisions for subject.

Whilst these activities have slowed over the current financial year, subject has won some larger subcontract jobs, which will allow turnover growth to continue.

Profit after tax for the financial year ended 30-JUN-2003 was \$384,000, a slight increase on the previous corresponding period.

Projected profit after tax for the current financial year is in excess of \$500,000.

Subject prices it's contracts at gross margins of 20% to 25% depending on the type of project.

- Commercial project subcontracted from the ABR Group due for completion mid-2004, valued at \$1,100,000.
- Roadworks for ABR Group at Redlands, Qld, due for completion in February 2004, valued at \$600,000.
- Sewerage Plant, Brisbane, Qld. Due for completion December 2004, valued at

\$500,000.

Future plans include a further steady expansion of existing operations whilst retaining financial stability. Directors have highlighted commercial subcontract jobs as a potential growth area.
